health and the condition of my voice, shall enathe me to express in a few words, my deep and hearifelt gratitude for this expression of your approbet on It public life has its cares and its trials, it has, occasionally, its consolations also Among these, one of the greatest and the chief, is the approbat on of those whom we have hon estly endeavored to serve this cup of conso lation you have now administered, full,

erowned abundartly overflowing at it is my desire at this time, in a few spenta neous and affectionate words, to render you the this is of a grateful heart. When I lately received your invitation in New York, nothing was further from my thoughts or expectations then that I should meet such an assembly as I now behold in Boston

But I was willing to believe that it was not meant merely as a compliment, which it was expeeted would be declined, but that it was in tralli your desire, at the close of the labors of a long session of Gongress, that I should meet you in the place, that we might mingle our mutual gether one happy social hour

acduous, and, is some respects in does deserve to be so regarded. I may indeed say, that in an experience of twenty years of public life, I have never yet encountered lubors or anxieties such

as this session brought with it We have been with one short intermiseion, continually in session for nearly ten months, from the commencement of the called session in the present month During this unusually long seriod, the public service did not allow us to revisit our homes. On our part it has been rather a struggle for prevention than for the attainment

We had to do hard work in contending, in a inthority against a majority a majority not, in deed, as events have proved, reliable at all cri . see and for every case, but such a majority as is, relud on for the usual emergencies and purpose and among them those who were depositories of

of any positive benefit

- For myself, and for those with whom I have had the honor to act, our object has been to maintain opposition against new theories and achemes at least until time should be allowed to have them submitted to the people for their own gonsideration. In what I have done, I have only acted with others. I was but one in a comnien band of associates I was associated capecially, with the excellent and estimable Mr. Davis, my colleague in the Senate and with a mass of distinguished gentlemen who repre sented in the other House the several districts of this Commonwealth. We acted together, as men holding, in almost all cases, common opin some and acting for a common end

In nothing do I claim any praise for good in tent and honest effort, which does not belong equily and alike to them all No more of your approbation is due to myself than to others, miere distinguished, who pursued the same exere. We all fought in a common cruse, and acted. I rejoice to say in a spirit of the greatest m harmony among ourselves

All will remember that the very first complaint of Gen Jackson against the late Bunk of the United States was this, that it had disap-pointed the expectations of the people in not lurnishing to the nation a sound and uniform corrency. In that doctrine there were, indeed, ineny who did not agree with him, but it was expressly on that ground that he undertook this grand reform of the currency, which many think was a very serry reform indeed. Ha suid that the currency was not so sound and so unt form as it was the duty of the Government to make it, and he therefore attempted to give us a currency more sound and more uniform

No sooner had the State Banks suspended, the Government, than the Administration raised the cry of treachery, want of faith, perfidy -a cry as false, in my opinion, as the cry mised a short time before by the same party, that they were sale and could cominit no error

But, whichter the suspension was rightfully made or not, the Administration seeing themselves shut out from the use of the Banks, finding that the experiment had failed and being incapable (for it is in the power only of great minds) of going back having no power to make any new experiments being like a mun flouting in a current ready to catch at any snag, and waiting for some piece of floating timber they were ready for any thing rather than the Bank It was plain that they would do precisely what they said they could not find it it was natural reasoning, to induce even our opponents to that they should do precisely what fliey did, and by saying that they had not the power, relieve themselves from the duty of exercising it tional means of performing their duty, and tried to avoid the responsipility, but the people forced asunder the nak the strong fibres reacted and caught him in the rent

PATENT SAFETY FUSE.

The Patent Safety Fuse, in blasting, takes the place of priming needle and match; and removes all danger in a riking fire in tamping and burns at a measured rate renders the dangerous business of blasting as safe as any other employment. It saves to their advantage to tall at 30 Main street before much time and labor. It allows the tamping to be purchasing elsewhere, rammed hard home, and leaves only an orthog the size of a knitting needle. It adds considerable to the force of the blast, by igniting the charge at the

Having scon the Patent Safety Puse for blasting, tested to our satisfaction, we cheerfully certify that, we are convinced that it saves much time and labor aids to the force of the blast, cusures certainty, and renders blasting perfectly safe. For dry blasting it is a great improvement, but-for wet ground it is invaluable. Mesers F Hickins & Co. contractors on Erie const. certify that they have been engaged in the Cornish Mines, England, where the Fuse is extensively used, and that it has never to their knowledge failed. They confirm our opinion of its value. We make no doubt that it will soon be in universal\_use.

ASIIIMA CURED The following extraordinary case of Asthma, which is authenticated by seventeen respectable and well known inhabitants of Greenwich, Ct., deserves, by all persons, a care ful perusel. The most prejudiced must own that evidence is on the side of these Pills, which, by the cures they are daily n aking show there is no neces sity for any other medicine

This is to certify that Thomas S Brown of Greenwich, Ct , was taken with a cold, numb feel ing, on the 13th of June last. He began to cough and raise phlegm and in the course of twenty four hours about two quarts of thick white jelly was ex-pertorated. Three physicians in Stamford, Green wich, and Sawpits, pronounced it a nervous humid spasmodic Asthma, and after prescribing for some time to no effect, the three consulted together, and finally declared that they could do him no good; it would and must result in consumption, and death would ensue, and that in a very short time. The pain was excessive in all parts of his body, and the difficulty in breathing was such as almost to cause strangulation "He was reduced to a mere skeleton and finally gave himself up to death. After being in this miserable state nearly two months he say an advertisement of Or. Brandreth's Vegetable Uni versal Pills, and immediately sent by Capt. J. War-ing of Greenwich-for a box, and found, relief in the caurse of a few days which encouraged him to per severe, and now having taken them for about four months according to the direction, is entirely precovered, and so far as we can judge in conse quence of taking the above Pills, which we have also used in our families, and have found them in valueble

ITHE most safe, effectual and economical tenu dy for diseases of the Human Constitution, that has eyer been discovered

Hose Pills are composed entirely of materials extracted from Medical Plants and are warramed not to contain one particle of mercury of any mineral substance. Dr. Kingley, the inventor of this value able medicine, from his knowledge of the human system derived from a long and extensive practice, has arrived to the conglishon, that the great and primary cause of most distascs is a derangement in the functions of the fivery or in other words an in

So will is this understood, that it is common for persons to say when they feel unwell that they are follous, meaning that they have too much bile in the stomach. Of the other hand, when the flow of bije is diminished, the process of digestion is my effectly performed the paint of becomes weak and emacrated. because nourishment contained in the food taken into the stomech is not properly extracted, and the food is ejected in a crude state. Dr. Kingley is confident that the tamous Hygean Theory so called, that impority of the blood is the cause of all diseaser. is a great absurdity. Every one who reflects upput the subject a moment, will perceive that impurity of the blood is a secondary, not a primary complaintstandard is it tremutous showing mere over the pile by soofling the asstern will allay it. the effect, and not the cause of the cause of the fiver are deranged and the flow the fonctions of the liver are deranged and the flow of the increased it is often taken up by it e absorbed to the circulations and be comes mingled with the blood as in Januarice, when impurity of the blood is caused by an increased flow Dr Kingley has spent much time in experiment ing with different vegetable medicines, for diveases met c'ne that can be prepared for general use , of offering them to the public, he is actuated more by behavolant than pecuniary mouves, as the price |

of the med cine will show Dr Kingley flatters himself that his long expect menting with regetable medicines has enabled him o discover the time and only substitute answering all the purpose of mercurials, without any of their attendant evils. One great quality of his family Pills is, that they have the alterative or neiple com bined with their rathartic or operative quality, so that they not only cleanse the stomach and howelty purging but they regulate the liver, change the morbid secretions, strengthen the digestive organs purify the blood, invigorate the circulation, and give lone and energy to the nervoussystem.

They are mild and pleasant in their operation, and almost immediate conviction of their utility from the trat dose. They can be taken with sately by perserve of any age and the feetile the infirm the neryour il e delicate, are strengthened by their opera tion, because they clear the system of bad humars quiet nervous irritabilities and restlessness from whatever source, and invariably produce sound

The Family Pills are an invariable remedy for jaundac, sick and nervous headache, dyspepsis cosureness eickness of the stomach teart um all bilious complaints, fevers of all kinds and it taken at the commencement will invariably check their progress, and save the patient from a protracted and dangerous sickness They are invaluable in ners ous and hypochondriecal affections loss of appetite and all complaints to which fen ales alorg are They operate as a mild and speeds purge and are a safe and certain remedy for worms in

I might publish a small volume of certificates but consider it unnecessary, as the med cine will recommend itself to all who will make trial of it
